

MDRAI VOICE AGENT

Carrier Bid Follow-Up Script&Developer Playbook

Primary use case: Drayage pricing outreach
Optional services: Transload and Final Mile

Prepared for	My DrayRate (MDR)
Platform	AI-powered drayage marketplace and operations platform
Document purpose	Production-ready voice script, decision logic, data capture, escalation rules, and QA requirements
Version date	July 12, 2026

Core objective: When the required quote threshold has not been met, the agent contacts eligible carriers, presents the load clearly, captures a complete and usable rate, confirms all assumptions and accessorials, and submits the quote into MDR without misrepresenting the shipment or pressuring the carrier.

1. Agent Mission and Operating Principles

- Close the quote gap. The agent activates only when MDR has fewer valid quotes than the user-selected threshold.
- Prioritize drayage. Transload and final mile are discussed only when selected on the load or required by the shipment.
- Produce a usable all-in quote. Every call should end with a complete rate, a defined callback time, a clear decline reason, or a human escalation.
- Never invent shipment details, promise freight, guarantee selection, or state that a carrier has won the load.
- Be conversational and efficient. The agent should sound like an experienced carrier-sales or drayage operations representative, not a telemarketer reading a long script.
- Respect carrier preferences, time zones, opt-outs, and calling-hour restrictions.

2. Activation Logic

1. A load is posted in MDR and eligible carriers receive an email invitation to quote.
2. MDR counts only valid, non-duplicate quotes that meet the load requirements.
3. After the configured email-response window expires, MDR compares the valid quote count with the requested threshold.
4. If the threshold has not been reached, MDR activates the AI voice agent for eligible carriers who have not submitted a valid quote.
5. The agent stops outreach when the threshold is reached, the bid closes, the shipment is covered, the user pauses outreach, or no eligible carriers remain.

Example: The broker requests five quotes. Three valid quotes arrive through email. After the configured waiting period, the voice agent contacts eligible non-responding carriers until two additional valid quotes are received or another stop condition is reached.

3. Required Inputs Before Any Call

Required data	What the agent must know
Load identity	MDR load or bid number; customer-facing reference only if permitted.
Equipment	Container size/type, chassis requirement, overweight or tri-axle requirement, reefer, hazmat, ISO tank, flat rack, open top, or other special equipment.
Routing	Port or rail ramp, pickup terminal, delivery city/state/ZIP, return location if known, and any final-mile destination.
Timing	Vessel or rail availability, earliest pickup, last free day, appointment requirements, delivery window, bid expiration, and expected start date.

Required data	What the agent must know
Cargo	Commodity, gross weight, container weight if available, hazmat details, temperature setting, value, and special handling.
Service scope	Drayage only, drayage plus transload, drayage plus final mile, or full combined scope.
Operational assumptions	Live load/unload or drop, free time, storage expectations, chassis source, pre-pull, yard storage, number of containers, frequency, and volume duration.
Pricing rules	Whether MDR wants line-item or all-in pricing, required currency, accessorials schedule, fuel treatment, and whether target pricing may be shared.
Carrier eligibility	Approved authority, insurance, equipment, geography, safety, fraud screening, service history, and do-not-call status.
Disclosure settings	Approved identity statement, recording disclosure, whether the broker/shipper name may be stated, and whether the load is firm or forecasted.
Warehouse storage	Whether storage is required; estimated pallet count; pallet dimensions/weight if known; storage start date and expected duration; ambient, refrigerated, bonded, hazmat, or other storage class; and whether pricing is needed per pallet per day, per pallet per month, or both.

4. Standard Call Flow

- 6. Confirm the correct carrier and contact.
- 7. Identify MDR and state the purpose of the call.
- 8. Confirm that the carrier handles the lane and equipment.
- 9. Give a concise load summary.
- 10. Ask for interest before reading every detail.
- 11. Collect the complete drayage rate and required accessorials.
- 12. Collect transload and/or final-mile pricing when selected.
- 13. Confirm capacity, assumptions, rate validity, and contact information.
- 14. Read back the quote and receive explicit confirmation.
- 15. Submit the quote into MDR and explain that selection is not guaranteed.

5. Core Agent Script

5.1 Opening - Correct Contact

AGENT

Hi, this is [AGENT NAME], an AI assistant calling on behalf of My Dray Rate, or MDR. Am I speaking with the person who handles drayage pricing or dispatch for [CARRIER NAME]?

IF YES

Great, thank you. MDR sent your company an email invitation to quote a load, and we are still collecting pricing. I can give you the details now and submit your quote directly into the system. Do you have about two minutes?

IF WRONG PERSON

No problem. Who is the best person for drayage pricing, and what is the best phone number or email for them?

IF TRANSFERRED

Hi, this is [AGENT NAME], an AI assistant calling on behalf of My Dray Rate. MDR sent your company a bid invitation for a drayage load, and I am calling to see whether you would like to quote it.

Disclosure: The exact AI and recording disclosure must be configurable by jurisdiction and the user's legal policy. The agent must never pretend to be human when asked.

5.2 Permission and Qualification

AGENT

The move is from [PORT/RAIL RAMP] to [DELIVERY CITY, STATE/ZIP]. It requires a [CONTAINER SIZE/TYPE] and [SPECIAL EQUIPMENT, IF ANY]. Are you currently handling this lane and equipment?

IF YES

Perfect. I will give you the key details, then I will ask for your best rate and any accessorials that would apply.

IF MAYBE

What part would you need clarified before deciding whether you can quote it?

IF NO

Understood. Is the issue the lane, equipment, timing, capacity, or another requirement? I can record that so MDR sends your company more relevant opportunities.

5.3 Concise Load Presentation - Drayage

AGENT

Here are the details: pickup is [TERMINAL/RAMP] in [LOCATION]. Delivery is [CITY, STATE/ZIP], approximately [MILES] miles one way. The container is [SIZE/TYPE], cargo is [COMMODITY], and the reported weight is [WEIGHT]. Pickup is expected [DATE/TIME OR AVAILABILITY], delivery is [APPOINTMENT/WINDOW], and the last free day is [LFD OR UNKNOWN]. The move is [LIVE/DROP], with [FREE TIME] included. [CHASSIS SOURCE/REQUIREMENT]. There are approximately [QUANTITY] containers [ONE-TIME/DAILY/WEEKLY]. Would you like to quote this load?

WHEN DETAILS ARE UNKNOWN

One item is still pending: [MISSING DETAIL]. I can mark your rate as conditional on that information. Are you comfortable quoting based on the current assumptions?

6. Drayage Pricing Capture Script

AGENT

What is your best line-haul or base drayage rate for this move?

AGENT FOLLOW-UP

Does that rate include fuel surcharge?

AGENT FOLLOW-UP

Does it include the chassis, or should chassis be listed separately?

AGENT FOLLOW-UP

Are there any port, rail, toll, gate, congestion, overweight, reefer, hazmat, pre-pull, storage, split, bobtail, or other charges that apply?

AGENT FOLLOW-UP

How much free time is included for loading and unloading, and what is your detention rate after free time?

AGENT FOLLOW-UP

What are your per-diem or storage terms if the container or chassis is held?

AGENT FOLLOW-UP

Is your quote all-in based on the details provided, excluding only charges caused by circumstances outside your control?

Pricing field	Capture requirement
Base drayage / line haul	Required
Fuel surcharge	Amount, percentage, included, or formula
Chassis	Daily rate, flat rate, included, carrier supplied, or customer supplied
Pre-pull	Amount and conditions
Yard storage	Daily rate and grace period
Detention	Free time, hourly rate, billing increment, maximum if applicable
Layover	Rate and trigger
Overweight	Surcharge and maximum supported weight
Hazmat	Surcharge and required documentation
Reefer	Surcharge, genset, monitoring, fuel, and temperature

Pricing field	Capture requirement
	requirements
Tolls / port fees	Included or separate
Split / additional stop	Rate per stop
Bobtail / dry run / truck ordered not used	Rate and trigger
Scale / permit / tri-axle	Rate or pass-through
Weekend / after-hours	Rate and conditions
Demurrage / per diem	Clarify carrier pass-through versus carrier-controlled charge
Other accessories	Name, amount, and trigger
Total estimated all-in	Calculated and confirmed by carrier
Rate validity	Expiration date/time and capacity limit

7. Optional Transload Script

TRANSITION

This load also includes an optional transload. Does your company provide transloading directly, or through an approved facility?

AGENT

The cargo is [COMMODITY], approximately [CARTONS/PALLETS/PIECES], [WEIGHT], and [CUBE]. It will move from a [CONTAINER SIZE/TYPE] into [TRAILER TYPE OR STORAGE]. The facility needs [FLOOR-LOAD/PALLETIZE/CROSS-DOCK/STORAGE/SPECIAL HANDLING]. Can you quote that scope?

- Facility name and address; confirm whether carrier-operated or third party.
- Dray from terminal to transload facility.
- Unload charge by container, pallet, carton, piece, labor hour, or hundredweight.
- Palletization, pallets, wrap, labels, sorting, segregation, inspection, and disposal.
- Container flip, chassis, lift, grounding, yard pull, and empty return.
- Warehouse receiving and outbound handling.
- Storage free days and daily/weekly storage.

- Outbound trailer loading and any live-load detention.
- Photos, counts, exception reporting, WMS/EDI requirements, and appointment fees.
- Minimum charges, overtime, weekend charges, and rate validity.

7.1 Warehouse Storage Pricing Script

AGENT This load may require warehouse storage after transloading. Can your facility provide storage for approximately [PALLET COUNT] pallets beginning [START DATE] for an estimated [DURATION]?
AGENT FOLLOW-UP What is your storage rate per pallet per day?
AGENT FOLLOW-UP Do you also offer a monthly rate per pallet, and if so, what is that rate and how is a partial month billed?
AGENT FOLLOW-UP How many free storage days do you include per pallet before charges begin? Please confirm whether the free days are calendar days or business days.
AGENT FOLLOW-UP When does storage time begin: upon warehouse receipt, after unloading is complete, after the free period, or at another trigger?
AGENT FOLLOW-UP Is there a minimum storage charge, minimum pallet count, minimum number of days, or minimum monthly commitment?
AGENT FOLLOW-UP Are inbound receiving, pallet handling, put-away, inventory, retrieval, and outbound release charges included in the storage rate or billed separately?
AGENT FOLLOW-UP Are there different rates for oversized, non-stackable, hazmat, refrigerated, bonded, high-value, or special-handling pallets?
AGENT FOLLOW-UP What are the pallet size and weight limits for the quoted rate, and how are oversized pallets calculated?
AGENT FOLLOW-UP Are weekend, after-hours, appointment, inventory-reporting, WMS, photo, labeling, shrink-wrap, restacking, or disposal charges applicable?
CONFIRMATION To confirm, storage is [RATE] per pallet per day and/or [MONTHLY RATE] per pallet per month, with [FREE DAYS] free [CALENDAR/BUSINESS] days per pallet. Charges begin [TRIGGER], and the additional warehouse fees are [LIST]. Is that correct?

The agent must capture all applicable warehouse-storage terms:

- Storage rate per pallet per day.
- Storage rate per pallet per month, including partial-month billing method.
- Number of free days per pallet and whether they are calendar or business days.
- Storage billing start trigger and billing increment.
- Minimum pallet count, minimum storage period, minimum monthly charge, and minimum invoice amount.
- Pallet dimensions, weight limits, stackability rules, and oversized/non-standard pallet multipliers.
- Receiving, unloading, pallet handling, put-away, inventory, retrieval, release, and outbound handling fees.
- Special storage rates for refrigerated, frozen, bonded, hazmat, high-value, food-grade, or climate-controlled cargo.
- WMS, inventory reports, cycle counts, photos, labeling, wrapping, restacking, segregation, and disposal charges.
- Weekend, holiday, after-hours, appointment, rush-release, and accessorial charges.
- Warehouse capacity, earliest receiving date, expected storage availability, and rate validity.

CONFIRMATION

To confirm, your transload quote is [AMOUNT] for [SCOPE], plus [ACCESSORIALS]. It is based on [ASSUMPTIONS] and valid through [DATE/TIME]. Is that correct?

8. Optional Final-Mile Script

TRANSITION

The shipment also has a final-mile component from [ORIGIN] to [FINAL DESTINATION]. Do you provide that service with your own equipment or an approved partner?

AGENT

The outbound freight is [PALLETS/PIECES], [WEIGHT], [DIMENSIONS], and requires a [DRY VAN/BOX TRUCK/FLATBED/REEFER/OTHER]. Delivery is [COMMERCIAL/RESIDENTIAL/JOB SITE], with [DOCK/LIFTGATE/INSIDE/WHITE GLOVE/APPOINTMENT] requirements. What is your best final-mile rate?

- Base final-mile line haul
- Fuel
- Equipment type and capacity
- Appointment fee
- Liftgate
- Residential or limited access
- Inside delivery / room of choice / white glove
- Driver assist or hand unload
- Pallet jack or special equipment
- Additional stops
- Detention and free time
- Redelivery / refused delivery

- Tolls, permits, and after-hours
- Proof of delivery, photos, and signature requirements
- Rate validity and capacity

9. Quote Read-Back and Submission

AGENT
Let me read that back to make sure MDR records it correctly. Your base drayage rate is [BASE]. Fuel is [FUEL]. Chassis is [CHASSIS]. The applicable accessorials are [LIST]. You include [FREE TIME], then detention is [RATE]. The estimated all-in rate under the stated assumptions is [TOTAL]. Your capacity is [CAPACITY], and the quote is valid until [EXPIRATION]. Did I capture everything correctly?
AFTER CONFIRMATION
Thank you. I am submitting your quote into MDR now under [CARRIER NAME]. The broker or shipper will review all quotes in the system. This does not guarantee selection or dispatch. If they choose your company or need clarification, MDR will contact you using [EMAIL/PHONE].
CLOSE
Before I let you go, is there anything else the customer should know about your rate, capacity, or operating requirements?

10. Common Call Branches and Objections

Carrier response	Approved agent response
“Just email it to me.”	Absolutely. MDR already sent the invitation to [EMAIL]. I can resend it. Before I do, may I confirm that this is the best email and that you handle [LANE/EQUIPMENT]? The bid closes [TIME].
“I did not receive the email.”	I can resend it now. Please confirm the best email address. I can also read the load details and capture your quote by phone so you do not miss the opportunity.
“What is the target rate?”	The current setting [DOES/DOES NOT] allow me to share a target. [IF ALLOWED: The target is approximately [AMOUNT], but MDR will still accept your best workable rate.] [IF NOT: Please provide your best market rate

Carrier response	Approved agent response
	based on the shipment details.]
“Who is the customer?”	The posting party has chosen [TO DISCLOSE / NOT TO DISCLOSE] its identity at the bidding stage. I can provide all approved shipment details and MDR will disclose additional information if your quote advances.
“Is the load awarded?”	The load is currently [OPEN FOR BIDS / FORECASTED / PENDING FINAL CONFIRMATION]. A quote is not an award. MDR will send a separate confirmation if the broker or shipper selects your company.
“Can you guarantee the load?”	I cannot guarantee selection. I can make sure your quote is complete and visible to the posting party before the bid closes.
“Your rate is too low.”	Understood. What rate would make the move workable for your company, and what cost factors are driving the difference? I will submit your best rate accurately.
“We need more information.”	I can capture the exact question and route it to the posting party. Would you like to provide a conditional quote based on a stated assumption while we wait?
“We do not work with brokers.”	Understood. MDR is a technology marketplace used by brokers and shippers. The posting party for this load is [TYPE, IF DISCLOSABLE]. I will note your preference so future invitations can match your requirements.
“We only quote by email.”	That is fine. I will resend the bid and mark your preference. The bid closes [TIME]. May I confirm the correct pricing email?
“Remove us from calls.”	Absolutely. I will record your do-not-call preference immediately. Would you also like to stop bid emails, or only voice calls?
“Are you a real person?”	I am an AI voice assistant for MyDrayRate. I am calling to help collect and submit carrier pricing. I can transfer or schedule a human follow-up when needed.

Carrier response	Approved agent response
Carrier is driving or busy	No problem. I can call back at a better time or resend the bid by email. What time works best before the bid closes?
Language barrier	Use the configured supported language only after confirming the carrier's preference. If unsupported, arrange a human callback; do not improvise critical pricing terms.

11. Voicemail and Callback Scripts

VOICEMAIL

Hi, this is [AGENT NAME], an AI assistant calling on behalf of My Dray Rate regarding a drayage bid from [ORIGIN] to [DESTINATION]. MDR sent the details to [EMAIL], and the bid closes [DATE/TIME]. You can submit pricing through the email, or call us back at [CALLBACK NUMBER] and reference bid [BID ID]. Again, this is [AGENT NAME] with MDR at [CALLBACK NUMBER].

SCHEDULED CALLBACK

Thank you. I will call you back on [DATE] at [TIME] in your local time regarding MDR bid [BID ID]. The bid currently closes [DATE/TIME].

Voicemail privacy: Do not leave sensitive cargo details, customer identity, exact value, access codes, or other restricted information in voicemail.

12. Developer Decision Logic

Logic area	Requirement
Pre-call eligibility	Carrier has not submitted a valid quote; quote threshold is not reached; bid is open; carrier is approved for the load; phone number is valid; local calling window is allowed; carrier is not on do-not-call list.
Carrier ranking	Prioritize carriers by lane/equipment match, historical service, proximity, active capacity, quote responsiveness, compliance status, and user preference. Do not rank solely by cheapest historical rate.

Logic area	Requirement
Attempt cadence	Configurable by user and jurisdiction. Suggested default: initial call after email-response window, one later retry, and one final attempt before bid close. Avoid repeated same-day calls unless requested.
Quote validation	Reject or flag missing base rate, ambiguous fuel, missing chassis treatment, missing validity, unsupported equipment, conflicting totals, or unclear accessorials.
Duplicate control	Match by carrier, bid, scope, and submission timestamp. A revised quote replaces or versions the prior quote; it must not increase the quote count twice.
Threshold counting	Count only valid quotes covering the required scope. A drayage-only quote should not satisfy a threshold for a combined drayage-plus-transload bid unless partial quotes are allowed.
Stop conditions	Required threshold reached; load awarded; bid closed; user paused/cancelled; carrier pool exhausted; or compliance issue detected.
Human escalation	Triggered by negotiation authority, legal/compliance question, customer identity dispute, unusual equipment, complex project cargo, uncertain terminal rules, aggressive caller, rate contradiction, system failure, or carrier request.
Confirmation	Store carrier's explicit verbal confirmation, transcript excerpt, call timestamp, agent version, rate assumptions, and any disclosure delivered.
Post-call action	Submit quote, notify posting user as configured, resend bid email if requested, schedule callback, update carrier preferences, or record decline reason.
Combined-scope validation	When warehouse storage is selected, a quote is complete only if the required storage terms are captured. A transload quote without storage pricing must be marked partial or conditional unless the posting user permits separate service quotes.

13. Structured Data to Save in MDR

- Bid ID, shipment ID, and posting user ID.
- Carrier legal name, DBA, MC/USDOT identifiers, location, contact name, role, phone, email, and preferred communication method.
- Call result: connected, voicemail, wrong number, callback, quote received, conditional quote, declined, do-not-call, or escalation.
- Lane and service scope quoted: drayage, transload, final mile, or combination.
- Warehouse storage terms when selected: pallet count; daily and monthly per-pallet rates; free days; calendar/business-day basis; billing start trigger; minimums; handling charges; special-storage class; capacity; availability; and rate validity.
- Every line-item rate, currency, included/excluded status, calculation method, and trigger.
- Estimated all-in total and MDR-calculated total; flag any mismatch.
- Capacity quantity, start date, daily/weekly capacity, equipment ownership, and terminal coverage.
- Rate validity, expiration, volume assumptions, and conditional terms.
- Decline reason using standardized taxonomy plus free-text notes.
- Carrier questions, missing information, follow-up owner, and due time.
- Call consent/disclosure status, recording link where lawful, transcript, summary, sentiment, and quality score.
- Agent version, prompt version, data source timestamps, and all system actions taken.

14. Standard Decline Reasons

Lane not serviced	No capacity	Equipment unavailable
Timing or appointment conflict	Rate not workable	Terminal not serviced
Overweight unsupported	Hazmat unsupported	Reefer unsupported
No chassis availability	Transload unavailable	Final-mile requirements unsupported
Insurance/compliance limitation	Customer or broker restriction	Insufficient shipment information
Bid already closed	Duplicate request	Carrier not interested in MDR opportunities
Other - requires note		

15. Guardrails and Prohibited Behavior

- State or imply that the load is awarded when it is only open for bids.
- Promise a minimum number of loads, guaranteed volume, payment terms, detention approval, or selection unless the system explicitly authorizes that statement.
- Change a carrier’s rate, negotiate below its stated floor, or split charges to make a quote appear cheaper without explicit authority.
- Invent last free day, terminal status, cargo weight, customer identity, appointment, or any missing shipment fact.

- Pressure the carrier with false scarcity, fake competing rates, or fabricated deadlines.
- Accept a quote from an unverified or ineligible carrier without flagging and escalation.
- Ask for bank information, passwords, one-time codes, or sensitive personal data.
- Expose another carrier's identity or confidential rate.
- Continue after a clear opt-out or call outside allowed local hours.
- Dispatch the carrier or issue a rate confirmation. A separate authorized workflow must handle award and dispatch.

16. Human Escalation Script

AGENT
I want to make sure this is handled correctly. That question requires a human from the posting party or MDR operations. I will record your question as [QUESTION], mark the quote as [CONDITIONAL/PENDING], and request a follow-up at [CONTACT METHOD]. What is the best time to reach you?
WARM TRANSFER, WHEN AVAILABLE
I can connect you with a human now. Please hold while I transfer the load details and our conversation summary so you do not have to repeat everything.

17. Call Quality and Acceptance Criteria

Criterion	Pass condition
Identity and disclosure	Agent identifies MDR, provides AI disclosure as configured, and answers honestly if asked.
Accuracy	All spoken shipment data matches the current MDR record; stale or conflicting data is flagged.
Completeness	Required pricing fields are captured, including fuel, chassis, accessorials, free time, validity, and capacity.
Confirmation	Agent reads back the quote and receives explicit confirmation before submission.
No false award	Agent clearly states that quote submission does not guarantee selection or dispatch.
Operational usefulness	A broker can compare and use the quote without having to call the carrier again for basic missing terms.

Criterion	Pass condition
Carrier experience	Call is concise, professional, interruptible, and responsive to questions.
Compliance	Calling windows, opt-outs, recording rules, and data privacy settings are enforced.
Auditability	Transcript, summary, rate version, timestamps, agent version, and actions are saved.
Fail-safe behavior	Low-confidence transcription, contradictory pricing, or missing critical details trigger review rather than silent submission.
Warehouse storage completeness	When storage is selected, the quote includes per-pallet daily and/or monthly rates, free days, billing trigger, minimums, separate handling charges, special-storage conditions, capacity, and validity.

18. Compact Production Script

Use case: This is the shortened live-call version. The agent should use the full logic and field requirements behind the scenes.

OPENING

Hi, this is [AGENT NAME], an AI assistant calling on behalf of My Dray Rate. MDR emailed [CARRIER NAME] a bid invitation for a drayage load, and we are still collecting pricing. Are you the right person for drayage rates?

PERMISSION

Great. The move is from [PORT/RAIL] to [CITY, STATE/ZIP] using a [CONTAINER/EQUIPMENT]. Do you have two minutes to review it and give me your best rate?

LOAD SUMMARY

Pickup: [LOCATION]. Delivery: [LOCATION]. Distance: [MILES]. Container: [SIZE/TYPE]. Weight: [WEIGHT]. Commodity: [COMMODITY]. Timing: [DATES/APPOINTMENT/LFD]. Operation: [LIVE/DROP]. Chassis: [REQUIREMENT]. Volume: [QUANTITY/FREQUENCY]. Special requirements: [DETAILS]. Can you cover it?

PRICING

WAREHOUSE STORAGE [IF SELECTED]

How much do you charge per pallet per day and per pallet per month? How many free days are included per pallet, are they calendar or business days, and what separate receiving, handling, retrieval, or minimum charges apply?

What is your base drayage rate? Is fuel included? What is the chassis charge? Please also give me any pre-pull, storage, detention, overweight, hazmat, reefer, toll, split, after-hours, or other charges that could apply. How much free time is included?

OPTIONAL SCOPE

[IF SELECTED] Can you also quote the transload and/or final-mile portion? I will capture those charges separately.

READ-BACK

I have [BASE] base, [FUEL], [CHASSIS], and [ACCESSORIALS], for an estimated all-in of [TOTAL], with [FREE TIME], capacity of [CAPACITY], and validity through [EXPIRATION]. Is that correct?

CLOSE

Thank you. I am submitting the quote into MDR. The posting party will review it; this is not an award or dispatch. If selected or if clarification is needed, MDR will contact you at [EMAIL/PHONE].

Appendix A. Recommended User Settings

Setting	Purpose
Required quote threshold	Number of valid quotes needed before outreach stops.
Email wait time	How long MDR waits after bid email before voice outreach begins.
Bid close time	Hard deadline for accepting quotes.
Maximum call attempts	Per carrier and per bid.
Calling window	Carrier-local days and hours.
Voicemail allowed	Yes/no and approved voicemail template.

Setting	Purpose
AIdisclosureandrecording	Jurisdiction-aware policy.
Sharepostingpartyidentity	Always, after qualification, only if asked, or never during bidding.
Sharetargetrate	Never, exact target, range, or only after first carrier rate.
Negotiationauthority	No negotiation, ask for best rate, or approved target/range.
Partialquotehandling	Allow or reject drayage-only, transload-only, or final-mile-only quotes.
Auto-submitconfidence	Minimum transcription and field-validation score.
Humanapproval	Required for all quotes, exceptions only, or fully automated.
Notifications	Real-time, threshold reached, exceptions only, or daily summary.
Carrierpreferencelearning	Remember preferred lanes, equipment, contact times, communication method, and opt-outs.

Appendix B. Minimum Test Scenarios

- Standard 40-foot dry container drayage quote
- Carrier quotes all-in rate
- Carrier quotes line items with a total mismatch
- Carrier requires chassis clarification
- Overweight load requiring tri-axle and permits
- Hazmat load with missing UN/packing group
- Reefer load with genset and temperature monitoring
- Unknown last free day and conditional quote
- Transload selected with floor-loaded cartons
- Warehouse storage selected with per-pallet daily pricing and free days
- Warehouse storage quoted monthly with partial-month proration
- Warehouse storage with separate receiving, put-away, retrieval, and outbound handling fees
- Oversized or non-stackable pallets requiring a different storage rate
- Refrigerated, bonded, or hazmat storage requiring special pricing and escalation
- Final mile selected with liftgate and appointment
- Carrier already submitted by email
- Threshold reached during an active call

- Carrier asks for customer identity
- Carrier asks for target rate when disclosure is disabled
- Carrier requests callback
- Wrong contact and referral
- Voicemail
- Do-not-call request
- Carrier becomes abusive
- Low-confidence speech recognition
- Bid closes during call
- Duplicate revised quote
- Human transfer and summary handoff
- System/API outage during quote submission
