

MDR AI Workforce&Voice Agent Platform Specification

Vision: MDR will provide customers with an AI Workforce. Each AI employee can be enabled or disabled individually, configured with business hours, escalation rules, approval requirements, and company-specific instructions.

Global AI Settings

- Master AI On/Off switch
- Enable/Disable each AI worker independently
- Business hours and time zone
- Voice selection
- Escalation rules
- Human approval requirements
- Call recording and transcripts
- Email and SMS permissions
- Maximum call attempts
- Customer/carrier exclusion lists

AI Carrier Recruiting Agent

Toggle: ON/OFF

- Calls carriers to onboard them.
- Updates equipment, lanes, insurance, contacts, and capabilities.
- Schedules follow-ups.

AI Carrier Rate Update Agent

Toggle: ON/OFF

- Calls carriers to refresh lane pricing and capacity.
- Updates MDR rate database automatically.

AI Bid Confirmation Agent

Toggle: ON/OFF

- Emails bid requests immediately.
- If no email response after configurable delay, calls carrier.
- Collects verbal pricing.
- Updates MDR with quote, decline reason, or callback.

AI Quote Follow-Up Agent

Toggle: ON/OFF

- Calls customers after quotes are sent.
- Answers questions.

- Captures objections.
- Alerts salesperson when needed.

AI Customer Service Agent

Toggle: ON/OFF

- Answers shipment status calls.
- Provides ETA, POD, container status, last free day and appointment information from MDR.

AI Dispatch Agent

Toggle: ON/OFF

- Checks pickup/delivery status.
- Confirms empty returns.
- Records delays and exceptions.

AI Appointment Scheduling Agent

Toggle: ON/OFF

- Calls warehouses, terminals and consignees.
- Books and confirms appointments.

AI Collections Agent

Toggle: ON/OFF

- Calls on overdue invoices.
- Captures payment commitments.
- Updates accounting notes.

AI Sales Development Agent

Toggle: ON/OFF

- Prospects shippers, brokers and freight forwarders.
- Qualifies leads and books meetings.

AI Ocean Freight Agent

Toggle: ON/OFF

- Obtains ocean rates.
- Confirms bookings, sailings and cutoffs.
- Compares routing options.

AI Warehouse Sourcing Agent

Toggle: ON/OFF

- Calls warehouses for capacity, cross-dock, transload and storage availability.
- Updates MDR warehouse database.

AI Contact Verification Agent

Toggle: ON/OFF

- Cleans CRM by verifying contacts, emails, phone numbers and decision makers.

Common Features for Every AI Worker

- Use company-specific prompts and branding.
- Read/write directly to MDR.
- Maintain full conversation history.
- Summarize every interaction.
- Automatically update CRM records.
- Trigger emails, SMS, tasks, and workflows.
- Transfer to a live employee when requested.
- Learn from historical shipments, vendors, and rates to make better recommendations.

Goal

Customers should be able to activate only the AI employees they want. For example, a broker may enable Bid Confirmation, Quote Follow-Up, Dispatch and Collections, while a freight forwarder may enable Ocean Freight, Customer Service and Sales Development.
